KONČAR KET

KONČAR's platform for digitalization of automated facilities, **PROZA NET**, is **the first system in the world** that is certified for cyber security of critical infrastructure according to the internationally recognized standard IEC 62443-2-4.

The **PROZA NET** platform is used for surveillance and control of facilities and plants operating in the areas of electrical power, gas and petroleum, industry, transport and water management. The platform is continuously upgraded in light of the technological advances, and this certificate represents a public recognition of innovation, which resulted in the platform becoming a globally recognizable product that is a technological trailblazer in the development of secure digital solutions for automated systems.

A power grid that incorporates cyber security is a precondition for automation and progress in the field of future smart cities. The fact that **KONČAR's** product was the first in the world to receive the certificate for cyber security will allow the creation of new digital solutions that will enable faster development of an advanced power grid, known as Smart Grid.
